*** Source of above concept information: Site Plan Design, Technical information, Equipment & Building Costs by NS Wash Systems at the request of J. R. / Jack Muellerleile who contributed the balance of the content.*

The above location appears to represent a good opportunity for the following reasons:

- 1. May require only **\$1,318,500 cash** to own the land and develop the site; also*
- 2. The estimated **potential return on cash of up to 90.7% (ROC)** is well above that expected for most carwashes.*

EXPRESS Exterior Carwashes are very much in evidence in the Southern, Rocky Mountain, Midwestern and Eastern parts of the country. They were conceived of more than ten years ago and now represent more than half the tunnel carwashes in the nation. Outside Southern California, they are a proven concept.

In Southern California, where traffic counts are generally much higher, the concept is just beginning to be noticed. Experienced operators and new to industry investors alike are now seeking viable locations for development using this proven concept.

Locations capable of generating exceptional results such as are documented at <http://www.4vqp.com/newhotstuff/expressexteriorcarwash.html> are VERY DIFFICULT to find. Most experienced commercial real estate brokers have no knowledge of the critically important factors associated with this type of land use. Furthermore, they tend to ignore many potential properties and only show buyers their own listings.

Jack Muellerleile does not take listings. He works exclusively for buyers. His experience includes 23 years with Big Oil and 20+ years on his own as a Petro-related & Carwash Industry consultant and real estate broker. He may be contacted as follows:
